BIO

Machine Learning Engineer with experience in computer vision, multimodal AI, industrial AI, and on-device deployment. Currently designing and developing AI agent systems using knowledge graphs and ontologies.

FIELD OF INTEREST

Computer Vision, Multimodal Learning, Edge AI, Industrial AI, AI Agents, Physical AI

EDUCATION

- Dongguk University**
M.Eng. in Computer Science and Artificial Intelligence

Feb. 2026
- Dongguk University**
B.S. in Mechanical, Robotics and Energy Engineering
Overall GPA: 3.49/4.5

Feb. 2024
- Andong National University**
B.A. in Ethics Education
Double Major in English Education
Overall GPA: 3.22/4.5

Feb. 2020

POSITIONS

- InterX – Gen.AI R&D**
AI Agent Engineer

Sep. 2026 – Present

 - Design AI agent architectures for proof-of-concept validation.
 - Incorporate knowledge graphs and ontologies into AI agent architectures.
- KC – Machine Learning Lab (ML2)**
Machine Learning Engineer

Dec. 2025 – May 2026

 - Developed on-device image captioning for data privacy and low-latency inference.
 - Optimized MobileVLM for image captioning using ONNX Runtime, cutting latency by over 30%.
 - Deployed and validated MobileVLM on iOS devices using Core ML, Swift, and INT4 quantization.
- Smart Vision and Media (SVM) Lab**
Graduate Research Assistant

Mar. 2024 – Feb. 2026

 - Developed a lightweight multi-illumination defect classification framework using contrastive learning.
 - Achieved state-of-the-art performance with real-time inference (43.1 FPS) on industrial defect datasets.
 - Conducted collaborative research with LG Display through an industry-academic project.
- Youngju Girls' High School**
Part-time High School Teacher

Mar. 2020 – Dec. 2020

 - Taught Social Studies (Grade 10) and Philosophy and Ethics (Grade 11), and managed student records.

PROJECT

Google Summer of Code with Intel OpenVINO Toolkit

Summer 2026

Project: [Agentic Edge AI System for Predictive Maintenance using OpenVINO](#)

- Built a unified AI chat interface, structured data querying, and a modular OpenVINO inference pipeline.
- Added five industrial use cases supporting image, sensor, audio-text, and raster-text data.

YOLO11n Deployment and Inference Optimization

Summer 2026

Project: [Person Detection in C++ with OpenVINO](#)

- Implemented person-detection pipelines using C++/OpenVINO on an Intel iGPU.
- Achieved $5.10\times$ faster model inference and $2.08\times$ higher throughput than the PyTorch CPU baseline.

Samsung Collegiate Programming Challenge

Summer 2025

AI Competition: [Multimodal AI for Everyday Photo Understanding](#)

- Proposed a CLIP/SigLIP-based ensemble model for multimodal image-text classification.
- Achieved 71% test accuracy and ranked 41st out of 242 participants (Top 50 finalist).

LG Display Industry–Academic Collaboration

Mar. 2024 – Feb. 2025

Project: [Multi-Illumination Defect Classification for Display Panel Inspection](#)

- Developed a multi-illumination defect classification algorithm for display panel inspection.
- Achieved a 98.5% defect detection rate across 195 defective samples.

LG Aimers

Winter 2024

AI Competition: [B2B Sales Opportunity Prediction](#)

- Developed a binary classification model to predict B2B sales opportunities from MQL data.
- Benchmarked 10+ ML models (e.g., XGBoost, LightGBM) for B2B sales opportunity prediction.

Autonomous Robot Navigation

Spring 2023

Dongguk University Course Project ([MEC4092-01](#))

- Developed a ROS2-based autonomous navigation system on a TurtleBot3 with NVIDIA Jetson Nano.
- Integrated LiDAR, ultrasonic, and IMU sensors and validated navigation in a real-world environment.

System and Method for Defect Classification in Images.

Korean Patent Application No. 10-2025-0155364, filed Oct. 24, 2025.

TEACHING ASSISTANT

Industry Training

AI Course (Machine Learning and Deep Learning)	Jun. 10–13, 23–25, 2025
LG Display	
Signal Processing and Image Processing	Aug. 19–23, 2024
LX Semicon	

University Courses

Introduction to Industry-Academia Project (CAI7177-01)	Spring 2025
Computer Science and Engineering, Dongguk University	
Creative Engineering Design (CSC2004-03)	Spring 2024
Computer Science and Engineering, Dongguk University	

TECHNICAL SKILLS

AI Frameworks	PyTorch, Hugging Face Transformers
Deployment	ONNX Runtime, OpenVINO, Core ML
GPU Computing	CUDA
Programming Languages	Python, Swift, MATLAB
Operating Systems	Linux (Ubuntu), macOS, Windows

LANGUAGES

Korean (native)
English (working proficiency)
